

Teaching Meeting on ACeSYRI Portal application

Thirty-five representatives of all European and Kazakhstan project Universities took part at the Teaching Meeting on ACeSYRI Portal application. This meeting was organized by employers of University of Žilina and Nazarbayev University on February 26, 2021 and was held on ZOOM-online platform of Nazarbayev University. The main aim of the meeting was description of ACeSYRI portal's application (<https://acesyri.fri.uniza.sk>) and its functionality for teachers PhD students, young researches, teachers. This meeting was organized in accordance with WP 3.1. “ACeSYRI portal realization“ of the ACeSYRI project.

At the meeting, prof. Levashenko said that development and application of portal on ACeSYRI is one of the essential expected results of the project implementation. This portal allows to connect of three types of participants: (a) international foreign co-advisors; (b) national advisors (supervisors) from Kazakhstan Universities and (c) PhD students, young researchers and students which works at area of Informatics Sciences.

The ACeSYRI portal functionality easy describes as advertisement dashboard of researchers. The foreign co-advisors propose Topics which describe the areas of their investigations. The national advisors formulate own Tasks based on these Topics. Of course, the national advisors can formulate an own Topic too. And finally, PhD students, young researchers and students select these Tasks for solving. Such, we construct a connection: international co-advisor - national advisors and young researcher (student, PhD student, etc.).

Next cases of the portal' application were presented at the meeting: (a) Registration of foreign co-advisors; (b) Registration of National Universities and its local administrators; (c) Registration of national supervisors and students; (d) Usage of the portal from foreign co-advisor's point of view; and (e) Usage of the portal from sides of national supervisor and PhD student or young researcher.

Development and Sustainability of ACeSYRI portal may be perspective task in different areas and projects.
