

## Satbayev University young researchers seminar

On April 24, 2021, KazNITU graduate students gave a speech to undergraduates studying in the discipline "Fundamentals of Artificial Intelligence". The graduate students presented their research and discussed the possible participation of undergraduates. The purpose of the event is to attract undergraduates to research conducted by graduate students. The graduate students presented the three reports mentioned below. The purpose of the seminar is to disseminate the results of the project by exchanging the experience of doctoral students and undergraduates on the basis of research conducted by doctoral students

Implementation progress: two-hour presentation of doctoral students ' results and discussion

Conclusion: Such an exchange of experience firstly allows you to inform undergraduates about the project, secondly allows undergraduates to choose research topics , and thirdly demonstrates the possibilities of the project as a certain way of uniting young researchers. The seminar was attended by 12 participants, including 3 doctoral students and 8 undergraduates. The meeting was organized by R. Mukhamediev, M. Elis and N. Seilova within the framework of the ACeSYRI (Erasmus+)project.
