

Summer series of seminars on Artificial Intelligence and Machine Learning

From June 7 to 19, 2021, the Kazakh National Research Technical University named after K. I. Satpayev (Satbayev University) together with the Institute of Information and Computing Technologies of the Ministry of Education and Science of the Republic of Kazakhstan (IICT of the Ministry of Education and Science of the Republic of Kazakhstan) held a summer series of seminars on artificial intelligence and machine learning within the framework of the ACeSYRI (Erasmus+) project.

This event was organized by the Institute of Cybernetics and Information Technologies of Satbayev University, headed by Prof. R. I. Mukhamediev. The main purpose of this event was to develop the potential of graduate students and young researchers in the field of information technology and focus on internationalization. The series of seminars was held in an online format through the

Google Meet platform, and the total number of participants was 57 people. 5 of them are foreign speakers who are participants of the ACeSYRI (Erasmus+) project, 3 professors of Kazakhstan and 3 doctoral students. 20 participants who are university teachers, employees of the organization

The program of the summer seminar series included two parts: (a) the basics of artificial intelligence and machine learning and (b) their practical application. In these parts, experts in the field of artificial intelligence made presentations:

The participants of the event were not limited to listening to lectures only. In addition, graduate students and young researchers answered test questions and performed practical exercises to improve and evaluate their skills in artificial intelligence and machine learning methods. The invited lecturers and participants were given official certificates.
